AESTHETIC AND SAFE SOLUTION

Nass Asphalt's Red Asphalt can be used in a wide range of environments, it offers both aesthetic and practical solutions. One of the benefits of red asphalt is its fast installation compared to coloured concretes and traditional block paving, a coloured finish is much quicker to achieve. It also offers all the structural qualities of a traditional wearing course.

AESTHETIC AND SAFE SOLUTION

It can be used for a whole range of purposes that includes house drives, decorative garden areas, pedestrian walkways, sports arenas, bridge protection, recreational areas and most importantly traffic demarcation and calming.

With traffic calming It can also be used as a visual aid for approaches to pedestrian crossings and to identify more clearly speed humps and other restricted traffic areas.

Its use across Europe includes demarcation of bus lanes, cycle lanes, parking areas and various other similar requirements.
