Trucks awaiting Paving Train

LOGISTICS SOLUTION

Nass Asphalt's Transport Department operates a fleet of more than 50 specialist rigid tipper vehicles, and tipper trailers, used for the transportation of aggregates, rocks and asphalt.

This fleet offers a comprehensive logistics solution to the Nass Businesses as well as external businesses by integrally connecting the aggregates jetty, quarry, sand washing and crushing plant with the Nass Contracting sites and asphalt and concrete businesses.

LOGISTICS SOLUTIONS

GPS Mapping Screen

We comply in full with all traffic legislation rules and regulations, and utilise sophisticated vehicle tracking and fleet management applications to ensure total control over vehicle locations, vehicle maintenance and repairs, and material deliveries.

Trucks waiting to offload Barge

Through our dedication to uncompromising service we have built a reputation for on-time deliveries which enables us to achieve and maintain our goal to provide unparalleled aggregate delivery services in Bahrain.

Truck being loaded on Barge

All our drivers are trained in-house and understand that road safety, and safety on site, is our top priority.

It is the aim of the Nass Asphalt Transport Department to exceed customer expectations and provide the best aggregate delivery solutions available in Bahrain.
