PRODUCTION SOLUTIONS

The Nass Asphalt Production department has built its reputation on supplying customers with products of the highest quality, in the correct volume and at competitive prices. It offers a full range of asphaltic and aggregate products that covers a wide spectrum varying from specialised polymer and red asphalts to large boulders for rock protection.

PRODUCTION SOLUTIONS

At both our production sites at Hidd and Hafeera our highly experienced production and laboratory teams are committed to total customer satisfaction by supplying an extensive range of consistently high quality products to customers' specifications and quantity requirements.

Our care, meticulous planning, strict management disciplines, and ISO9001 compliant quality control procedures combine to maintain our first class service levels.

The Nass Asphalt Product Range includes the following:

- Red Asphalts
- Polymer Asphalts
- High Skid Resistant Asphalts
- Cold Mix Asphalts
- All Bahrain Standard Specification Asphalts
- Sub-base, road-base & wet-mix materials
- Single-size materials
- Filling materials
- Marine materials for rock protection work
- Pipe-surround, drainage & filter materials
- Rockery stones & landscaping
- Dust & sand
